UPDATE: Product Allocations for U.S. Solutions Products – North Cove & Puerto Rico Products

Dear Valued Customer:

As previously communicated, we continue to make strong progress at North Cove. Currently, we have restarted all of the site's 10 manufacturing lines and have returned to pre-hurricane production levels. In parallel, work continues to replenish inventory to support our customers' and patients' needs.

We are pleased to share specific changes in allocation levels for **five product codes that will increase to 100% or 110%** and **four product codes where allocations will be fully removed**, effective March 4, 2025. These increases in allocation levels are shown in Table 1 and are consistent across Baxter's direct customers and distribution partners. For a full listing of all product codes manufactured at the North Cove, NC site and associated allocations levels as of March 4, 2025, please see Table 2.

In addition, due to increased demand for Viaflex Small Volume IV solutions and Mini-Bag Plus quad packs, we have invested in resources at our manufacturing facilities in Puerto Rico and effective March 4, 2025, **allocation levels for all codes in these product groups will increase to 125%**. These product codes are listed in Table 3.

Allocations for all product groups are determined based on historical ordering from your facility from March 1, 2024 to August 31, 2024. Please note that there is a typical 1 to 2-week lag time for product to flow through the full distribution network after allocation changes are implemented.

For medical information, support or questions, please contact MedInfo@Baxter.com, call 1-800-933-0303, or visit [Hurricane Helene Clinical Resources for U.S. Healthcare Professionals](#).

Please note that the Force Majeure Event is still in effect as per the notice sent to affected customers and shall remain in effect until the effects of the Force Majeure Event have sufficiently abated to allow full performance under all contracts, at which time Baxter will provide formal notification that the Force Majeure Event has ended.

Thank you for your continued partnership.

Sincerely,

Mary Henson

General Manager, U.S. and Canada
Infusion Therapies and Technologies
