UPDATE: Product Allocation Removals for U.S. IV Solutions

Dear Valued Customer:

We are pleased to share that **effective immediately**, allocations have been removed on virtually all IV Solutions Product Codes manufactured at our North Cove, NC facility following Baxter's recovery and rebuilding from the impact of Hurricane Helene. The details regarding the allocation removals are listed in Table 1.

These changes are applicable to Baxter's direct customers and distributor partners. Please note that there is a typical one to two-week lag time for products to flow through the full distribution network after allocation changes are implemented. We have asked our distributor partners to remove allocations on these Product Codes to their end customers.

As we come to the end of this crisis and return to pre-hurricane practices, we thank you for your patience and partnership as we recovered from an unprecedented, 1000-year storm. Despite the tremendous challenges, we harnessed our collective strengths: problem solving, collaboration, and shared priority of patient care first. We can now move forward, together, more resilient, stronger and prepared for the future.

In connection with this update, we anticipate ending the Force Majeure Event in early June and will provide formal notification regarding the end of the Event.

For medical information, support or questions, please contact MedInfo@Baxter.com, submit an inquiry [HERE](#), or visit [Clinical Resources for U.S. Healthcare Professionals](#).

My sincere thanks,

Mary Henson
General Manager, U.S. Canada
Infusion Therapies and Technologies

Table 1: Product Codes manufactured at North Cove, NC site with changes to Allocation Levels, Descriptions, and NDCs

Product Code	Description	NDC	Current Allocation Level	5/13 Allocation Level
2B7127	0.9% SOD.CHL.IRRIGATION, UROMATIC USP 3000ML	00338-0047-47	Allocation Removed	
2B7487	LACTATED RINGERS IRRIGATION, ARTHROMATIC 3000ML	00338-0137-27	Allocation Removed	
2B0296H	70% DEXTROSE INJECTION USP, 2000ML	00338-0719-06	Allocation Removed	
2B7117	STERILE WATER FOR IRRIGATION UROMATIC, USP, 3000ML	00338-0003-47	Allocation Removed
